Chocolade blijft consument verleiden, snoep minder populair

Nieuws 584

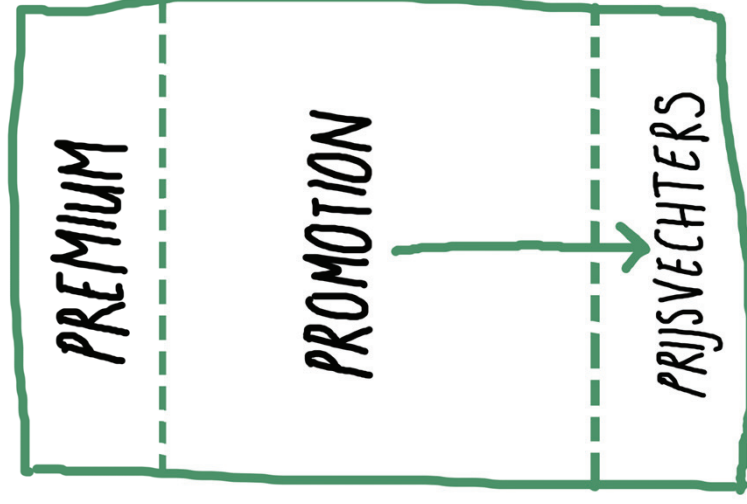

De consument heeft zijn suikerverconsumptie in de afgelopen jaren flink teruggeschroefd. Het aantal snoepwinkels is sinds 2005 met een kwart gedaald. De verkoopwaarde van chocoladerepen nam echter in de afgelopen vijf jaar met liefst 20 procent toe. Sommige chocoladeproducten, zoals repen met een hoog cacaopercentage en een laag suikergehalte, worden in toenemende mate geassocieerd met de stijgende populariteit van bewuste voedingsmiddelen.
